

EHS&S CRITICAL SAFETY RULES

L3Harris Environmental, Health, Safety and Sustainability

To perform any of the critical safety rule activities, proper training and authorization is required.

WORKING AT HEIGHTS/FALL PROTECTION

Working at heights above 4 ft requires the use of fall protection.

LOCK-OUT/TAG-OUT

Isolate all forms of hazardous energy when servicing or performing maintenance on machines or equipment.

ELECTRICAL SAFETY

Follow documented electrical safe work practices when working with or when exposed to energized electrical circuits 50 volts or more AC/DC.

MACHINE SAFEGUARDING

Do not tamper or disable machine or equipment guarding.

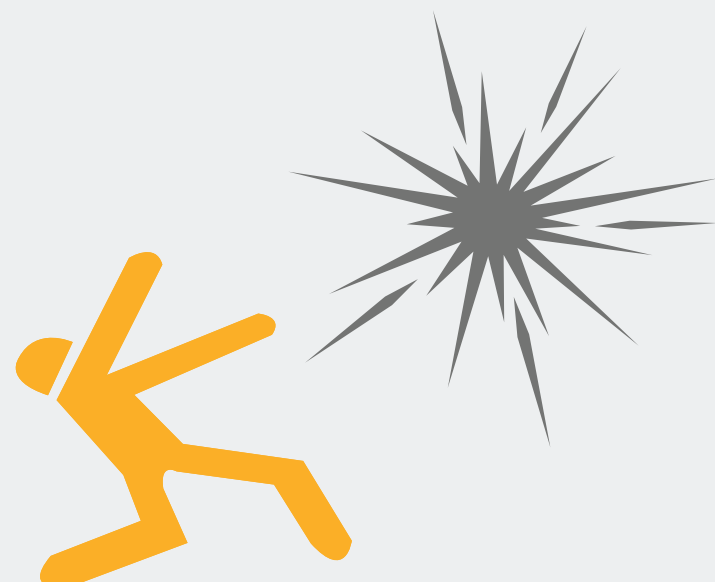

CONFINED SPACE

Follow written procedures for entry into any confined space.

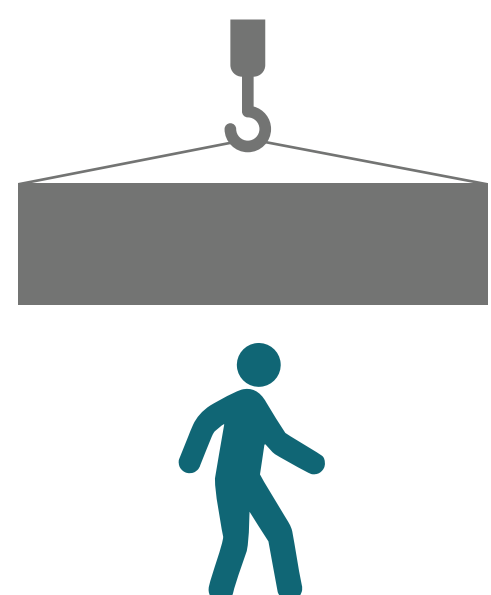

POWERED INDUSTRIAL TRUCK (PIT)

Operators must follow all safe operating procedures.

PROPELLANTS, ENERGETICS, PYROTECHNICS (PEP)

Do not violate engineering or administrative barriers associated with remotely controlled or shielded operations. Always wear the required personal protective equipment.

RIGGING AND HOISTING

All rigging and lifting operations shall be performed to control the load and keep personnel at a safe distance.

Failure to follow the Critical Safety Rules will lead to disciplinary action.
