

Title:

Aerojet Furnished Materials/Tooling**Aerojet Quality Note****C16****Rev # Date****0****11/5/08**

Material supplied by Aerojet to be used in seller's delivered product shall be to the following:

- Inspect upon receipt for evidence of Aerojet acceptance, shipping damage, and lot identification.
- Material traceability shall be maintained throughout the manufacturing process, assuring that items manufactured by the seller are identifiable to the material lot number provided by Aerojet.

The seller shall perform the following when Aerojet furnishes tools/gages:

- Upon receipt inspect for damage in transit. Assure completeness, presence of operating instructions, and a valid calibration status as applicable.
- Provide adequate protection to preclude damage or deterioration during use, handling, and storage. When deficiencies, damage or deterioration occur, notify the Aerojet buyer.
- Provide periodic calibration of gauging per Aerojet instructions or request Aerojet to perform calibration at least 30 days prior to the expiration date shown by the calibration status. When deficiencies occur, notify the Aerojet buyer immediately.
- Support Aerojet periodic audits of Aerojet-furnished tools/gages.
- The tools provided by Aerojet shall be returned with the parts upon completion of PO (Purchase Order) or immediately upon request by Aerojet unless otherwise specified on PO.
