

Title:

Packaging of Bulk Rolls of Rubber Insulation

Aerojet Quality Note**H04****Rev #****Date****0****11/10/08**

Each roll of rubber insulation will be individually boxed to allow handling and storage of single rolls. Rolls will be boxed to preclude damage to the center cardboard tube. Good commercial practices will be used to ensure the safe and undamaged receipt of the materials to Aerojet.

Each roll will be limited to a maximum of 200 pounds (including packaging). The minimum weight of each roll shall be no less than 50 pounds net weight of rubber, not to include packaging materials.

Label each roll on the inside of the center cardboard tube with the following information: part number/specification number, lot number, material description, PO number, date of manufacture, and expiration date.

Rev	Date	Description of Change	Changed By

This document is an integral part of the contract (purchase order) in which referenced. **Applicable Revision:** The revision in effect at the time the purchase order is placed.
