

**E04: Temperature Sensitivity**

**Effective Date: 11/14/2019**

Each item, package, or container shall reflect the specification, drawing, nomenclature, or other design description required by the Purchase Order. Temperature-sensitive materials shall be maintained within the limits prescribed in the applicable document during storage and shipment. Material 40 degree F or less requires special temperature labels to be attached to the exterior of each package. The label shall reflect the words "Temperature Sensitive Material" and the maximum material storage temperature allowed.

Proper storage requirements must be clearly specified on material label.

Each shipment shall be label or clearly mark one end and one side of each shipping container or package with the notation "Temperature Sensitive Material" and the special handling or environmental requirements for the item (such as "STORES, DO NOT OPEN, OPEN IN CLEAN ROOM ONLY").
