

Effective Date: 11/14/2019

H07: Labeling and Handling of Hazardous Material and Explosives

Suppliers shall provide the Material Safety Data Sheet (MSDS) for hazardous materials with each shipment.

For explosive materials, the following documents shall be provided:

Material Safety Data Sheet (MSDS); Competent Authority Approval document or DOD Interim Hazardous Classification, if applicable; or, DOT exemption for explosives in a pipe bomb.

The seller shall label or clearly mark one end and one side of each shipping container or package with the notation "Caution" and the special handling or environmental requirements for the item (such as "STORES, DO NOT OPEN, OPEN IN CLEAN ROOM ONLY").

Deliverables:

Each Shipment shall be accompanied by a Material Safety Data Sheet (MSDS) and shall be clearly marked at minimum of one side of shipping package with "Caution" and the special handling or environmental requirements for the times.

When explosive parts are shipped in addition to the basic requirements, one or more of the following documents shall accompany the shipment:

Competent Authority Approval document or DOD Interim Hazardous Classification, if applicable; or, DOT exemption for explosives in a pipe bomb.
